HIGHER AND STRONG. An Active London Market Has a Fa-

vorable Effect. New York, Apr. 12,-The London market for Americans this morning came very strong and active, and under the impetus of foreign buying orders our market was higher and

and active, and under the impetus of foreign buying orders our market was higher and strong. Tile cilques took advantage of this movement to unload to a certain extent, while libere was considerable covering of shorts at the same time. The result was a somewhat feveribh and unsettled market until later in the desired to the dealings.

The openior was strong at advances ranging up to \$\frac{1}{2}\$ for cent., the latter in Louisville and Nashville. There was an active trading with Reading and Omaha as most prominent accks, and while the latter was constituously strong, the general list yielded fractional amounts. Later Jersey Central and Wheeling and Lake Rrie became strong, and the general market responded, the early losses being recovered before noon. A buoyant tone marked the dealings in the afternoon, and New Eagland, Louisville and Nashville, and Norfolk and Western preferred Joined the strong and active stocks. There was again a fractional reaction, but the market closed about steady, close to the opening figures.

Money on call has been easy, ranging from 5 to 9; fast loan at 5, and closing at 5 bid. Sterling exchange is dull, but steady to from. Actual business at 48514 to 485% for 60-day bills, and 487 to 4874 for foreign and have been dull, but steady to from. Actual business at 48514 to 485% for foreign and active stores and strong form 5 to 9; fast loan at 5, and closing at 5 bid. Sterling exchange is dull, but steady to from. Actual business at 48514 to 485% for 60-day bills, and 487 to 4874 for foreign and have been dull, but steady to firm. State bounds have been dull and steady.

The Trouble at Ikeshimah.

A report from a Japaneso newspaper of the accident on the United States steamer Omaha, of which Capt. Selfridge was in command, at Ikeshimah, near Nagasaki, Japan, alleges that in violation of the law the officers of the Omaha permitted shell practice within fifty yards of the above. The shells were reported as having exploded. The natives secured one of them near the shore and took it in the town where the accident occurred, killing four and wounding seven men. Capt. Selfridge has been ordered home and is now at San Francisco.

Use Salvation Oil for severe headache, and you will always find almost instant relief by so doing. We recommend it as a good family medicine. Cowboy Robber Caught.

THE RAILROAD'S TURN. Strange Development in a Suit Brought

for Damages. Granerson Kelton entered suit against the Baitimore and Potomac Bailr s d Company to recover \$10,000 damages for injuries received on Aug. 15, 1884, from being put off a train. The trial took place in the circuit court yes-terday, and resulted in a vordict for the road. Kelton claimed that he was going from this the city to Bowle, and was but in being put off the train, naming the place where he was dropped. On the other hand, the company showed by reliable testimony that the man had been put off at Wilson, some two miles from where the accident had occurred, and, further, that he was attempting to steal a ri le on a freight train about the time he was hur.

HOW THE SCIENCE OF MEDICINE HAS BEEN HAMPERED.

THE MEDICAL PROFESSION.

Professional Ethics" Worse Than Enstern Caste-A Letter From a Physician Who Follows the School," But Prefers Hunity to "Profes-sional Ethics." manity

While the medical profession has made great progress within the century, it is an acknowledged fact that that progress has not been as great as that made in other sciences. This is undoubtedly due to that inhibition the profession has laid on itself, and known as "professional ethics." There ought to be but one school of medicine, and they should embrace every known medicine and treatment. That such is not the case is seen in the existence of the aliopathic, homeopathic, and the eelectic schools. These differences are due to the "professional ethics." which prohibit one school from following the practice of another. "Professional ethics." is akin to caste in the eastern countries, a deadly enemy to progress. Occasionally, however, a physician is found who rises above the selfishness of professional ethics, and comes out flat-looted for the people and the proprietary medicine that will cure sufferers without the help of a dootor. An example of such a man is Dr. J. N. Cheney, of Ellaville, Schley county, Ga. He and his pariner have, by all odds, the largest practice in the county. So high does Dr. Cheney stand in the estimation of his fellow-countrymen that he has been elected @erk of the Superior Court for nine consecutive times, and he holds that office to-day. That he is a man worthy of confidence, the public is authorized to seek a knowledge of his character from any prominent public man in Georgia, from Gov. Goradon down. This offer is made without consulting any one of the officials suggested.

Here is Dr. Cheney's own letter, which formanly frankness, for clearness of expression, and for knowledge of his subject must command the respect of all:

Band the respect of all:

ELLAVILLE, SCHLEY COUNTY, GA.,
March 21, 1887.

SWIPT SPECIFIC CO., ATLANTA, GA.—My Dear
Sire: For some time I have been contemplating a letter to you. Do you know that your
S. S. S. medicine has revolutionized the old
school practice of medicine, of which I am
bold to say I am a faithful disciple? For centuries it has been held that the only sure treatment of that most dreadful scourge of all the
ills of human fiesh, contagious blood poison,
was mercury. The danger of this treatment

For Sale by all Drugg. is known to all. Aware of this danger the profession has been for centuries seeking a harmless cure. Throughout the agos, from time to time, have aitsen persons who claimed to be able to cure it by vegetable and harmless remedies. They have always been welcomed by the advanced men of the medical profession, who are ever eager for anything from any source, promising relief to suffering humanity. Umhappily, no permanent results of benefit were secured. Indeed, it got to be received as a settled fact in medicine, that the disease could only be cured by mineral and dargerous treatment. I myself, although brought up in the progressive school, which I still closely follow in all its certain treatment, harbored this belief; and I should probably be in the same blind faith now, had it not been demonstrated beyond the peradventure of a doubt, that it can be cured by a purely vegetable and harmless treatment, viz., Swift's Specific.

Specific.

Notwithstanding the fact that ever since a boy I had known of the recipe as a famous Georgia plantation medicine for the slaves, and that I was familiar with many instances, and that I was familiar with many instances where cure had been claimed, yet so wedded was I to my professional ethics that I could not hearken to the innumerable witnesses about me.

was I to he protessional ethics that I cound not hearken to the innumerable witnesses about me.

Eeveral years ago a negro came to me for treatment of a very severe sore throat. I canterized it once, twice, three times, and without other than temporary benefit. On the fourth visit he made my office I told him, after a thorough examination, that he had contracted blood poisoning. He confessed that he had; but said a doctor had cured him with black pilis—mercury of course. Finding the foul and fearful disease yet in his system, I thought I would just experiment on him and see if there was any virtue in the favorable reports I had been hearing for years of Swift's Specific. 9 I put him under treatment of nothing but S. S. S. Four large bottles completely cued him, and left his throat as beautifully heded as I could desire.

Since then I have used H. S. S. in numerous cases in my practice, and I have never failed to make saafe, perfect, and permanent curwhere the patients have followed your directions failfully.

It is because of these remarkable cures that I have male in my own practice with S. S. S. that I chefully send you this testimony of Swift's Specific's sure success in all such cases. Those wao know the almost inevitable permanently dangerous effects of inercury will welcoms your discovery of S. S. S. as a boon to humanity. The medical profession, always wary o proprietary medicines, is coming allowly, and in some cases scerely, to the use of S. S. in casesof blood disorder. Of course, a medidine that cures poisoning in its worse form my proprietary the blood of every disorder. Yoursrespectfully.

INVALIDS' HOTELISURGICAL INSTITU

No. 663 Main Street, BUFFALO, N. V.

Not a Hospital, but a pleasant Remedial Home, organized with A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS.

And exclusively devoted to the treatment of all Chronic Diseases. osing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of skilled specialists in medicine and surgery that compose the Faculty of this widely-eclebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We earnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or beed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endesvoe to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court benest, sincere investigation, have no secrets, and are only too giad to show all interested and candid people what we are doing for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

By our original system of diagnosis, we can treat many chronic diseases just as successfully without as with a personal consultation. While we are always glad to see our patients, and become acquainted with them, show them our institutions, and familiarize them with our system of treatment, yet we have not seen one person in five hundred whom we have curred. The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost minute particulars in their several large and the age. Is it not a marvelous degree of accuracy which enables on operator to credity locate a fracture in a submarine cable nearly three thousand miles [age?] Our venerable clerk of the weather has become so theroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and forceful what the weather will be in Florida or New York as well as if a several hundred miles did not, intervene between him and the places named. And so in all departments of modern science, what is required is the knowledge of certain signs. From these scientists deduce accurate considerations of the science, discusses have certain tunnistakable of a science, discusses have certain tunnistakable of a science, discusses have certain tunnistakable of a science, discusses have certain tunnistakable of the most very constitution of the remaining and personally between the and the places of the most very certain tunnistakable of the most very certain tunnistakable of the most very certain tunnistakable of the construction of the places and personally between th

examining our patients. In recognizing diseases without a personal examination of the patient, we claim to possess no mineutious powers. We obtain our knowledge of the patients disease by the practical application, to the practice of medicine, of well-established principles of modern silence. And it is to the necurincy with which this system has reslowed us that we owe our almost world-wide reputation of skill fully treating linguring or chronic affections. This system of practice, and the may close success which has been attained through it, demonstrate the fact that diseases dispay pertain phenomena, which being subscribed to scientific analysis, furnaish abundant of the skill full practitioner aright in determining the nature of diseased on ultimas. The mode ample resources for treating linguring or chronic diseases, and the greatest skill, are thus placed within the casy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and treating patients at a distance are contained in "The People's Culymon Sense Medical Adviser," By R. V. Pierce, M. D. 1900 pages and over 300 colored and other ill astrations. Sent. post-yaid, for \$1.50. Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treat ise, on your particular disease, will be sent you, with our terms for treatment and all 1 articulars.

COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes his whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such diseases than he who attempts to treat every ill to which flesh is helr, without giving special attention to any class of diseases, Men, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or literature. literature.

By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of every malady incident to bumanity.

OUR FIELD OF SUCCESS.

AND
LUNG DISEASES.

The treatment of Diseases of the Chronic Nasal Catarrh, Larythgolius, Bronchitis, Asthma, and Consumption, both through correspondence and at our institutions, constitutes an important speciality.

We publish three separate books on Nasal, Throat and Lung Diseases, which give much valuable information, viz: (i) A Treatise on Consumption, Laryngitis and Bronchitis price, post-paid, ten cents, giving new and successful treatment; price, post-paid, two cents, (3) A Treatise on Chronic Nasal Catarrh; price, post-paid, two cents, (3) A Treatise on Chronic Nasal Catarrh; price, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (3) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (4) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (5) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (5) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (6) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (6) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (6) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (6) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (6) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (7) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (7) A Treatise on Consumption, Chronic Diarrice, post-paid, two cents, (8) A

DISEASES OF DISEASES OF DISEASES OF DIGESTION.

Dyspepsia, "Liver Complaint," Obstinate Constipation, Chronic Diarrica, Tape-worms, and kindred affections are among those chronic diseases in the successful treatment of which our specialists have attained great success. Many of the diseases affecting the liver and other organs contributing in their functions to the process of digestion, are very obscure, and are not infrequently mistaken by both laymen and physicians for other maladies, and treatment is employed directed to the removal of a disease which does not exist. Our Complete Treatise on Diseases of the Diseases or the physicians for other physicians for other maladies, and treatment is employed directed to the removal of a disease which does not exist. Our Complete Treatise on Diseases of the Diseases of the Diseases of the Diseases of the Diseases.

KIDNEY

DISEASES.

BRIGHT'S DISEASE, DIABETES, and kindred maladles, have been very largely treated, and cures effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examination of patients, who can, therefore, generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this class of maladies as the old and world-famed World's Dispensary and Invalids' Hotel. Our specialists have acquired, through a vast and varied experience, great expertness in determining the exact nature of each case, and, hence, have been successful in nicely adapting their remedies for the cure of each individual case. BRIGHT'S DISEASE, DIABETES, and

These delicate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition and stage of advancement which the disease has made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to do positive infury in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to cure these diseases, although possessing very superior remedies, knowing full well from an extensive experience that the only safe and successful course is to carefully determine the disease and its progress in each case by a chemical and microscopical examination of the urine, and then adapt our medicines to the exact stage of the disease and condition of our patient.

To this wise course of action we attribute the

WONDERFUL To this wise course of action we attribute the marvelous success attained by our specialists in that important and extensive Department of our specialists in that important and extensive Department of our stitutions devoted exclusively to the treatment of discases of the kidneys and bladder. The treatment of discases of the urinary organs having constituted a leading branch of our practice at the Invalide Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladics, written in a style to be easily understood, we have published a large Illustrated Treatise on these diseases, which will be sent to any address on receipt of ton cents in postage stamps.

BLADDER DER, STONE IN THE BLADDER, Gravel, Enlarged Prostate Gland, Retention of Urines, and kindred affections, may be included among those in the cure of which our specialists lave achieved extraordinary success. These are fully treated of in our illustrated pamphlet on Urinary Diseases. Sent by mail for ten cents in stamps. STRICTURES AND URINARY FIS-STRICTURE.

STRICTURES AND URINARY FISof inexperienced physicians and surgeons, causing false page available
of inexperienced physicians and surgeons, causing false passages,
relief and cure. That no case of this class is too difficult for the
skill of our specialists is proved by cures reported in our fileatrated treaties on these maladies, to which we refer with pride. To
intrust this class of cases to physicians of small experience is a
dangerous proceeding. Many a man has been ruined for life by so
doing, while thousands annually lace their lives through unskillful
for a large, illustrated treaties containing many testimonials.

Epileptic Convulsions, or Fits, Pas STRICTURE.

NERVOUS Epileptic Convulsions, or Fits, Paralysis, or Falsy, Locomotor Ataxia, St. Vitus's Dance, Insomnia, or inability of Sept. and threatened insamity. Nervous Bebility, arising from overstudy, excesses, and other causes, and overy variety of nervous affection, are treated by our executions for these diseases with unusual success. See numerous cases reported in our different illustrated

HERNIA (Breach), or RUPTURE, no matter of how long standing, or of what size, is promptly and permanently cured by our specialists, without the knife and without dependence upon trusses. Abundant references. Send ten cents for RADICAL CURE OF RUPTURE.

Illustrated Treatis PILES, PISTULÆ, and other diseases affecting the lower lowels, are treated with wonderful success. The worst cases of sile tumors are permanently cured in fifteen to twenty days, send ten cents for illustrated Treatise.

DELIGATE
DISEASES.

Organic weakness, nervous debility, premature decline of the manly powers, involuntary visual lesses, impaired memory, mental anxiety, absence of will-power, melancholy, weak back, and kindered affections, are speedly, thoroughly and permanently cured.

To those acquainted with our institutions, it is hardly necessary to say that the invalids' Hotel and Surgical Institute, with the branch establishment located at No. 3 New Oxford Street, London, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment and cure of those affections which arise from youthful indiscretions and permicious, solitary practices.

We many years ago, established a special Department for the treatment of these diseases, under the management of some of the most skiliful physicians and surgeons on our Staff, in order that all who apply to us might receive all the advantages of a full Council of the most experienced specialists.

We offer no apology for devoting so much

WE OFFER NO APOLOGY.

We offer no spology for devoting so much attention to this neglected class of diseases, believing no condition of humanity is too wretched to merit the sympathy and best services of the noble profession to which we belong. Many who suffer from these terrible diseases contract them innocently. Why any medical man, intent on doing good and alleviating suffering, should shim such cases, we cannot imagine. Why any one should consider it otherwise than most honorable to cure the worst cases of these diseases, we cannot understand; and yet of all the other maladies which afflict mankind there is probably none about which physicians in general practice know so little.

We shall, therefore, continue, as heretofore, to treat with our best consideration, sympathy, and skill, all applicants who are suffering from any of these delicate diseases.

GURED AT HOME. Most of these cases can be treated by us when in person.

Our Complete and Illustrated Treatise (168 pages) on these sub-

in person.
Our Complete and Illustrated Treatise (188 pages) on these subjects is sent to any address on receipt of ten cents in stamps.

SURGICAL
PRACTICE.

Hundreds of the most difficult operations known to modern surgery are annually performed in the most skillful manner, by our Surgeon-specialists, remove cataract from the eye, thereby curing blindness. They also straighten cross-eyes and insert artificial ones when needed. Many Ovarian and also Fibroid Tumors of the Uterus are arrested in growth and cured by electrolysis, coupled with other means of our invention, whereby the great danger of cutting operations in these cases is avoided.

Especially has the success of our improved operations for Varfoccele, Hydrocele, Fistule, Ruptured Cervix Uteri, and for Ruptured Perincum, been alike gratifying both to ourselves and our patients. Not less so have been the results of numerous operations for Stricture of the Cervical Canal, a condition in the femine generally resulting in Burrenness, or Sterility, and the cure of which, by a safe and painless operation, removes this commonest of impediments to the bearing of offspring.

Although we have in the preceding paraset on receipt of ton cents in stamps.

Alt CHRONIC

Although we have in the preceding parascraphs, made mention of some of the special
scraphs, made mention of some of the special
aliments to which particular attention is
given by the specialists at the Invalida'
Hotel and Surgical Institute, yet the institution abounds in skill, facilities, and apparatus for the successful treatment of
overy form of chronic aliment, whether requiring for its cure medical or surgical means.
All letters of inquiry, or of consultation, should be addressed to
